ANALYTICAL CONTROLS

2026 PAC Detailed Hydrocarbon Analyzer (DHA) Training – Rotterdam

Dedicated Training to Improve Performance, Knowledge, and Skills

PAC Training Program – Rotterdam

The AC Analytical Controls® product line offers a range of high-tech analyzers for petrochemical sample streams, based on Gas Chromatography. Our products are user-friendly and easy-to-use, although the technique is complex. To improve your skills, obtain the best results, and completely understand your analyzer, PAC offers a complete program of factory, customized and on-site trainings. These courses are designed to assist operators and lab engineers in their day-to-day operation of PAC systems by providing the optimal mix between theory, practice, and hands-on training. Training improves laboratory productivity and the accuracy of instrument results.

DHA Course Description

The 2-day DHA training course is designed for new and experienced users of PAC products; however, a basic knowledge of gas chromatography is required. Class sizes are small, so the course is highly interactive and flexible.

The courses consist of theoretical and practical sessions, including:

- System details, software and hardware application in a practical way
- Interpretation of results and discussion
- Troubleshooting and maintenance
- Calibration of the instrument

Detailed Program:

Day 1: Introduction to Hardware and Software

- Introduction to detailed hydrocarbon analysis applications
- DHA configuration and system description
- Hardware: valves, actuators, columns, and detectors
- Software introduction and database handling
- System start-up and software installation and configuration

Day 2: System Calibration, Troubleshooting, and Maintenance

- Calibration of the system and generating an AC report
- Calculations and interpretation of results
- Laboratory exercises for day-to-day operation
- Troubleshooting and maintenance
